

2.1 - Detailed list of Linux modules that will be modified or affected

1. bluetooth
2. btaudio (bt878)
3. bt848

2.2 - Detailed list of any new modules that you will produce

1. Not Applicable

2.3 - Class diagram showing affected modules [and any new modules] and how they related to one another

2.4 - List or table of explanations of all command line options that will be implemented

Commands to be Implemented	Explanation
----------------------------	-------------

bluetooth on	This command toggles on the bluetooth receiver if it is off, and it can be used at any location, from the terminal. Else, a message reading, "bluetooth already off," will be displayed.
bluetooth off	This command toggles off the bluetooth receiver if it is on, and it can be used at any location, from the terminal. Else, "bluetooth already off" will be displayed.
